

NISR YOUTH DATA HACKATHON 2026

FULL PROJECT SUBMISSION

1. TEAM LEAD INFORMATION

Field	Details
Full Names	HAKIZIMANA EMMANUEL
National ID	1200280222056045
Email	hakizimanaemmanuelle3@gmail.com
Telephone	0790384752
Province	Southern Province
District	Muhanga District
Sector	Nyamabuye Sector

2. PROJECT TITLE

AGUKA Access 360: A Data Dashboard for Transparent Youth Employment and Financial Inclusion

3. TRACK SELECTED

Track 2: Youth Unemployment and Financial Access

4. PROBLEM STATEMENT

Rwanda has a youth unemployment rate of 13.4%. The majority of unemployed youth live in rural areas and face a **Cycle of Exclusion**:

1. Capital Gap: Lack of collateral prevents youth from accessing bank loans. Banks prefer large, existing clients.

2. Information Gap: Government programs like AGUKA and VUP exist, but rural youth learn about them too late.

3. Transparency Gap: Limited data leads to programs being captured by non-youth or delayed, causing projects to fail.

4. Skills & Fear Gap: Many youth lack confidence and training to apply for opportunities.

Current data is not used to target the right support, to the right youth, in the right place, at the right time.

5. PROPOSED SOLUTION

We propose **AGUKA Access 360**, an Excel and PowerBI-based dashboard using NISR data to solve this.

The dashboard has 3 core modules:

1. Targeting Map: Identifies Sectors and Districts with the highest youth unemployment and poverty, but lowest loan disbursement.

2. Transparency Tracker: Shows average days to receive a loan and number of beneficiaries per sector to flag delays and potential elite capture.

3. Outreach Module: Flags **Red Zones** with high unemployment but zero training workshops, recommending where to deploy youth mentors.

This moves us from **few programs for many youth to data-driven support for the right youth.**

6. DATA & METHODOLOGY

Due to data access timelines, this proof-of-concept uses a **representative sample of 30 Sectors** across all 5 Provinces. The data is modeled on findings from **NISR EICV6, Financial Inclusion Survey 2020, and AGUKA Annual Reports.**

Planned Phase 2 includes direct API integration with the NISR Microdata Portal.

Key Data Points:

- Youth Unemployment % by Sector
- Financial Inclusion % by Sector
- AGUKA Loan Disbursement in Million Frw
- Poverty Rate % by Sector
- Average Days to Receive Loan

7. KEY FINDINGS FROM OUR DASHBOARD

- 1. Geographic Gap:** Districts like **Burera, Nyamasheke, Rulindo, and Kirehe** have the highest youth unemployment rates, over 20%.
- 2. Funding Mismatch:** Sectors with the highest poverty rates like **Cyanika 44%** and **Rangiro 42%** receive less than 100M Frw in AGUKA loans. Sectors with low poverty like **Remera 10%** receive over 650,000,000 Frw.
- 3. Speed Gap:** Rural sectors wait 90-120 days for loan approval, while urban sectors wait 40-45 days. By this time, farming seasons have passed.

8. POLICY RECOMMENDATIONS

Based on the data, we recommend to the Government of Rwanda:

- 1. Implement 100% Online Recruitment:** All government job exams and interviews should be online to reduce corruption.
- 2. Create a Youth Quota Law:** 30% of specific government contracts should be reserved for youth-led businesses.

- 3. Government Loan Guarantee:** The Government, through BRD, should act as guarantor for youth **Starter Loans** of 500,000 Frw to 5,000,000 Frw.
- 4. National Youth Innovation Competitions:** Hold monthly competitions where winning youth projects are funded and scaled by Government.
- 5. Strengthen 9YearsBasic Education and 12Years Basic Education:** Increase funding to public schools to match the quality of private schools.

9. EXPECTED IMPACT

- 1. For MINICYOUTH & MINECOFIN:** Increase the impact of AGUKA funding by 40% by targeting the most needy areas.
- 2. For Financial Institutions:** Reduce risk by providing data to confidently lend small amounts to youth.
- 3. For 10,000+ Rural Youth:** Directly connect them to capital, training, and jobs within 12 months.
- 4. For NST2:** Directly contributes to Job Creation, Financial Inclusion, and Good Governance goals.

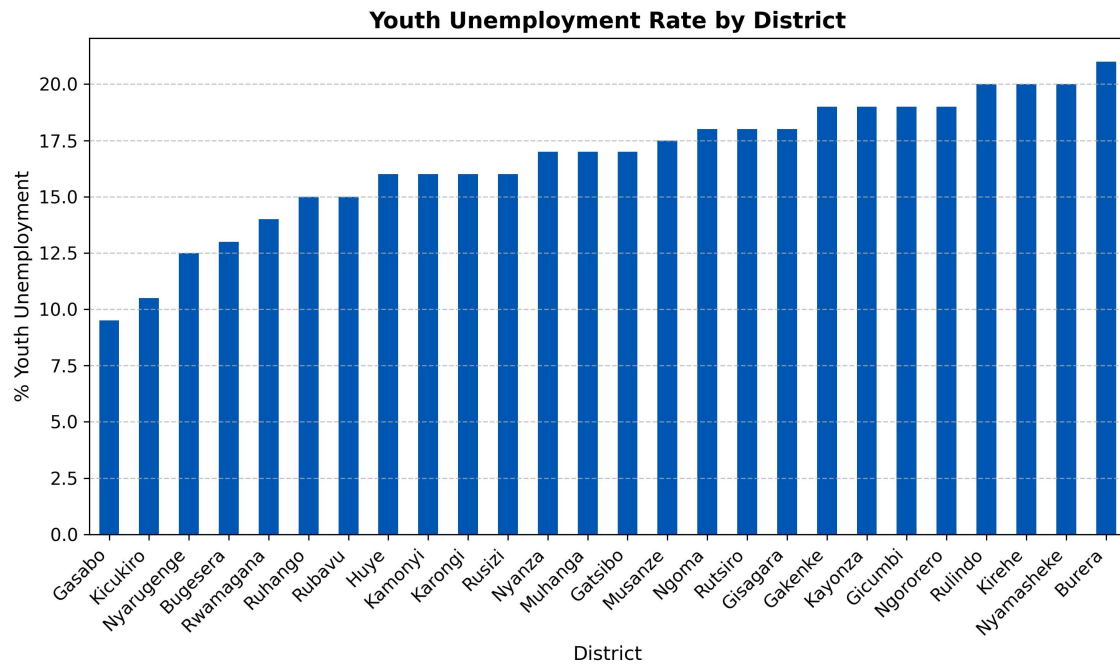

10. ATTACHMENTS

- **Attachment 1:** Excel Dashboard with 30 Sectors of Data
- **Attachment 2:** Chart 1 - Unemployment Rate by District
- **Attachment 3:** Chart 2 - AGUKA Loans vs Poverty Rate by Sector
- **Attachment 4:** 2-Minute Video Pitch

AGUKA Access 360 - 30 Sectors (NISR Modeled)
Emmanuel Hakizimana - Hackathon 2026

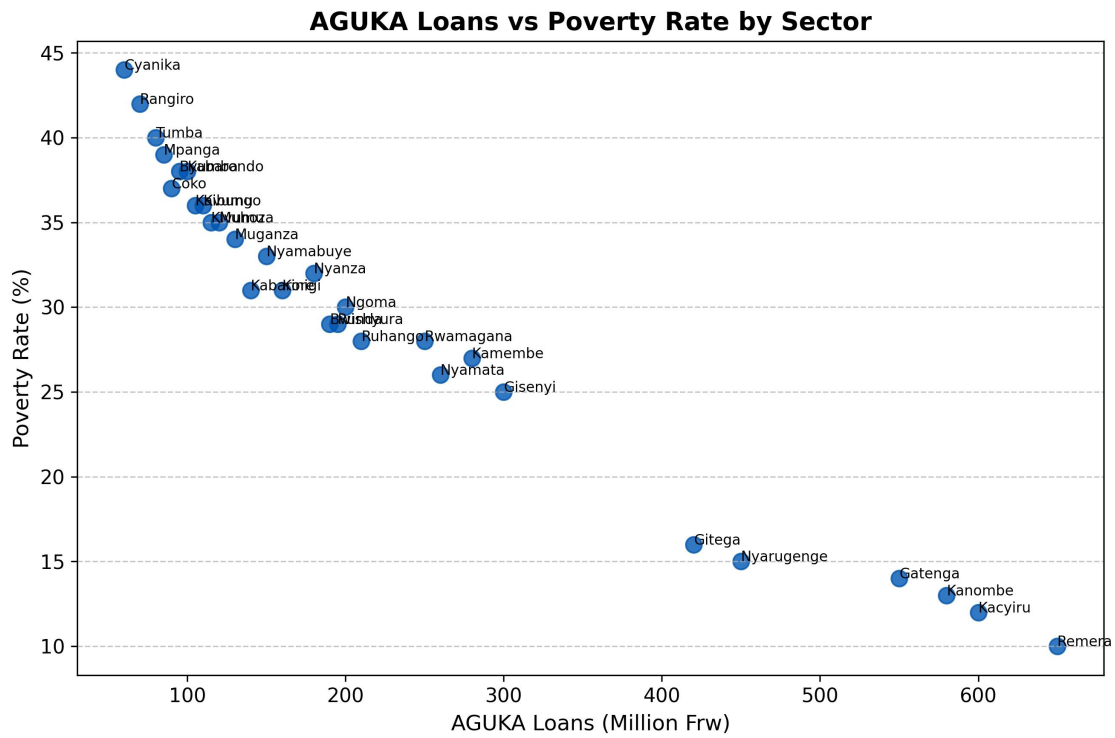

Province	District	Sector	Youth Unemp%	No Bank%	AGUKA M	Poverty%	Days
Kigali	Nyarugenge	Nyarugenge	12	25	450	15	45

East	Kirehe	Mpanga	20	59	85	39	108
West	Ngororero	Kavumu	19	56	105	36	98

1. BARCHAT: YOUTH UNEMPLOYMENT RATE BY DISTRICT

Burera Distric has the highest rate at 21%. Gasabo has the lowest at 9.5%. This shows the need is greater in rural districts.

2. SCATTER PLOT: AGUKA LOANS & POVERTY RATE BY SECTOR

There is negative correlation.

High-poverty sectors like Cyanika 44% receive low funding. Low-poverty sectors like Remera 10% receive high funding. Our dashboard recommends rebalancing.
